Hi Grace,

Just got you your voice message – glad to hear that is the case RE the JP2's for R6.

We'll touch base with Mark once things calm, just to iron out future requirements and protocol implementation. The message we have from the ASPECT team is that they are willing to accommodate us in the GIS community as best they can, but I think formalizing that a bit would be prudent (so we may involve Harvey and others on a future call).

Thanks Grace,

Craig

Craig – Please ignore my voicemail. Found Mark Thomas' contact info (ASPECT program manager) and he is working on posting the JP2's for R6 as I type. He's the only one doing the processing right now so he's moving as fast as he can.

Eric/Janine – Obliques and aerals (both in JP2) should be posted to the same FTP site they sent you earlier. Mark made a point of mentioning the aerals are dark due to bad weather and time of flight. Obliques should be a bit better.

Janine, you have my # - let me know if you need anything else.  
-grace
